

Table 1.1

Contingency table of the number of people who tested positive or negative using the ANA test and the number of people later confirmed to truly have (or not have) lupus

	Actually have disease (10,000*0.2% = 20)	Do not actually have disease (10,000*99.8% = 9,980)
Test positive	20	1,397
Test negative	0	8,583
